Job Brief

On offer is a fantastic opportunity for a Full Stack Developer to join a widely successful company who have developed market leading print products for clients across a wide range of sectors including governments, retail, education, local authorities, and financial institutions.

In this role you will play a pivotal part in the success of the cross-functional I.T. team. Working on new and existing products, the successful Full Stack Developer would have the opportunity to use all their skills and knowledge to provide outstanding solutions that solve our customers secure print requirements. You will need to have a good understanding of architecture and solution design, as well as demonstrable skills and experience of working with Visual Studio, C#, and .NET core.

The ideal Full Stack Developer would have a good understanding of C# and the relevant technologies. Someone who is keen to work within a small but enthusiastic team, with an enthusiasm for IT/Tech and keenness to learn new and emerging technologies to stay at the forefront of technologies.

Tech Stack: *Visual Studio, .NET, C#, COM, SQL, MySQL, Xamarin, TortoiseSVN, subversion, APIs, JavaScript*

The Role:

- Working on new & existing products
- Working as part of a cross-functional team

The Person:

- Full Stack Software Development experience
- Professional experience in C#
- Understanding of architecture & solution design
- Methodical with excellent attention to detail
- Initiative-taking and able to manage their own busy workload
- Take an active role in problem solving and issue investigation
- Understanding of the importance of a user-friendly GUI
